RUBBERDAMOMOLOGY AND ADVANCED PHOTOGRAPHY

Bulleen Melbourne

1 DAY WORKSHOP: MONDAY, 22ND AUGUST 2016

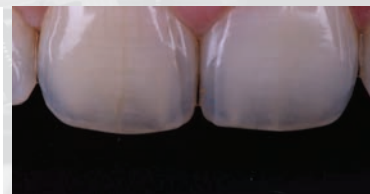

RUBBERDAMOMOLOGY -from start to finish-

THEORY & WORKSHOP A 9:00am-1:00pm

Rubberdamology: It is well known that all dental work must be under full control by the operator. We pay much attention to details and procedures, learning all new aspects of operative dentistry protocols, but waste valuable time in reaching our ideal goal due to factors such as saliva, bleeding, tongue, cheeks and lips. In this course, learn how to place and work with rubberdam systems.

Participants will learn through the exercises including:

- Basic and advanced equipment for isolation
- Classic protocols of isolation in operative dentistry (endo | restorative | pros)
- Additional isolation: Knots, teflon, retraction cord for 100% result
- Clamp modification
- Difficult cases and solutions
- Split-dam overview for different tasks
- How to prep teeth under the dam
- How to use it during cementation
- And much more.....

ADVANCED DENTAL PHOTOGRAPHY

THEORY & WORKSHOP B 2:00pm-5:00pm

Advanced photography: This workshop is created to share simple and effective digital photography concepts for the planning and analysing aesthetic treatment. You will learn all the protocols of portrait and intraoral photography, tips and tricks related to choice of cameras and settings for professional dental photography.

- Learn protocols of portrait and intraoral photography
- Positioning, lighting and photography techniques
- Tips and tricks related to choice of cameras and settings for professional dental photography
- Using photography for smile design
- Basic aesthetic parameters
- Cameras and basic settings
- Lenses and light sources (flashes, soft boxes, LED lightning)
- Portrait photography
- Intraoral photography: protocols and equipment (retractors, contrastors, mirrors, and polarizing filters)
- Artistic photography for marketing and presentations
