Microvision Aesthetics All About Veneers: Full Course From Digital Smile Design, Lab Communication, Isolation to Bonding

Maxim Belograd

May 21st - 23rd, 2019, TAIPEI, TAIWAN

Introduction

This course is dedicated to full veneer cosmetic dentistry and smile makeovers, including lab communication and work up. We will be working on a REAL CLINICAL CASE going through all the stages of Photography, DSD, Digital Scanning, Wax-up, Digital wax up, Resin Model printing, Prepping (on models), Isolation and bonding.

This course is essentially an A to Z veneer course and one of a kind offered in Taiwan, taught by well-respected and internationally renowned Dr Maxim Belograd. The course is for anyone wanting to go to the next level with veneer placement and cosmetic dentistry or just brushing up their skills all round. Don't miss out on this unique course as it may not be repeated in Taiwan.

We would like to remind you to bring:

- Laptops (Mac with keynote is the best option/ or windows with PowerPoint 10)
- Digital cameras

Overview

This programme is a UNIQUE course offered in India which combines DSD, Smile Designing, Isolation, Tooth Preparation, Lab Communication and Cementation. So basically it is an A to Z Laminate Veneer course.

Program

Microvision Aesthetics All About Veneers: Full Course From Digital Smile Design, Lab Communication, Isolation to Bonding

Day 1: Planning of Aesthetics: Photo/Video/Smile Design Design with real patient demonstration.

Lecture Component (2 Hours)

- Principles of smile design
- Facially driven treatment planning
- Golden proportions in dental aesthetics
- Photo/video protocols for smile makeovers
- Cameras, lenses, flashes, soft boxes, additional light for portrait and intraoral photo/video workflow.
- How to use smartphones for simplified but efficient approaches
- DSD
- Main principles of smile design

Hands-On Component (Rest of time)

The main aim of this workshop is to learn how to plan a smile makeover and to use simplified and efficient protocols of photo/videography taking as well as Digital Smile design. We will be starting this process with a real clinical case.

Powerful guide of step-by-step techniques consist of:

- Settings of photo/video cameras and smart phones
- Working with light
- Step-by-step portrait protocol
- Step-by-step intraoral photo protocol
- DSD tools, software, settings
- Step-by-step Smile Design: from motivational project for deep analysis and transfer information to dental lab

The participants will progress through all exercises photo/videography taking and digital smile design

Agenda

- 9:00 am - 11:30 am Lecture: Smile makeover, Ceramic Veneers and DSD protocols
- 11:30 am - 12:00 am Coffee Break
- 12:00 pm - 12:30 pm Demo of photo protocol for DSD
- 12:30 pm - 14:00 pm Hands on video/photography using DSLR camera (full frame and cropped frame)
- 14:00 pm - 14:45 pm Lunch
- 14:45 pm - 16:00 pm Step by step DSD workshop - on Stock Images (Part 1)
- 16:00 pm - 16:15 pm Coffee Break
- 16:15 pm - 17:45 pm Step by step DSD workshop - on Stock Images (Part 2)
- 17:45 pm - 18:00 pm Break
- 18:00 pm - 19:00 pm Step by step DSD workshop - on colleagues or LIVE patient images.

Program

Microvision Aesthetics All About Veneers: Full Course From Digital Smile Design, Lab Communication, Isolation to Bonding

Day 2: Ceramic Veneers: Digital Scanning, Mock-up, Prep, Provisional Restorations.

Lecture Component (3 Hour)

- Basic principles of planning for porcelain veneer restorations
- Transferring of smile design to wax-up and mock-up
- Additive wax-up and mock-up
- MicroVision rules of tooth preparation through mock-up
- Provisional restorations

Hands-On Component (Rest of time)

The main aim of this workshop is to learn how to transfer smile design project into real smile prototype and then how to provide MicroVision driven preparation teeth for ceramic veneers.

The Powerful guide with step-by-step techniques consist of:

- Transferring of Wax-Up into Mock-up
- Analysis of smile prototype. Correction possibilities
- Step-by-step preparation protocol through mock-up
- Tips and tricks with provisional restorations

The participants will progress through the sequence from mock-up fabrication, preparation and provisional restorations.

Agenda

8:30 am - 9:30 am	Completion of DSD cases with participants from Day 1.
9:30 am - 10:30 am	Lecture Introduction of Aesthetics Cases from restored single crown to full mouth rehabilitated cases
10:30 am - 11:00 am	Coffee Break
11:00 am - 12:15 pm	Lecture: Ceramic veneers from idea to realization. Mock-up and different preparations. Immediate Dentine Sealing.
12:15 pm - 13:15 pm	Lecture: DSD wax up protocol and case communication. Silicon Keys for record transfer. Digital Vs Analogue technique. Taking impressions analogue and digital, analysis of impressions and of models/scans for overview perspective and treatment planning. Tips and tricks to improve final impression quality
13:15 pm - 14:00 pm	Lunch
14:00 pm - 15:00 pm	Demo of mock-up and initial preparation and different veneer types 1, 2 and 3
15:00 pm - 16:30 pm	Hands-on: mock-up and initial preparation for different veneer types on SIX TEETH
16:30 pm - 16:45 pm	Coffee Break
16:45 pm - 17:15 pm	Demo of final preparation: finishing and design of different margins
17:00 pm - 19:00 pm	Hands-on: final preparation, finishing and design of different margins on THREE TEETH and DIGITAL SCANNING on prepped teeth for participants to analyse their preps digitally.

Program

Microvision Aesthetics All About Veneers: Full Course From Digital Smile Design, Lab Communication, Isolation to Bonding

Day 3: Ceramic Veneers: Overview of Different Design Preparations. Isolation and Bonding

Lecture Component (4 Hours)

- Isolation methods in restorative dentistry
- Clamps, cords, floss ties for good retraction and perfect isolation during bonding
- Bonding protocols for porcelain veneers
- Adhesion nuances considering types of ceramic
- Sequence of luting

Hands-On Component (Rest of time)

The main aim of this workshop is to learn how to isolate the case for bonding of porcelain veneers and how to perform stress less luting.

Powerful guide of step-by-step techniques consist of:

- RUBBERDAMology techniques considering all tips and tricks for clean and predictable isolation
- Try-in of ceramic veneers
- Luting protocols: etching, silanizing, bonding
- Controlled insertion of restorations and cleaning from adhesive materials
- Post-bonding and polishing

The participants will progress through all exercises including isolation and bonding of ceramic veneers.

Agenda

8.30 am - 9.30 am	Demo + Hands-on: finalizing the prep and fabrication of provisional restorations
9.30 am - 10.30 am	Lecture: RUBBERDAMology and protocols of ceramic veneer bonding
10.30 am - 11.00 am	Coffee Break
11.30 am - 12.45 pm	Demo + Hands-on: Tips and tricks for Rubber Dam Application
12.45 pm - 13.30 pm	Lunch
13:30 pm - 14.30 pm	Demo: 6x Veneers Bonding step by step
14.30 pm - 15:30 pm	Hands-on: Bonding of 2x Veneers step by step (PMMA veneers)
15.30 pm - 16.00 pm	Coffee Break
16.00 pm - 17.00 pm	Demo: DSD intra-oral transfer with Silicon Stent and Temp material and photographic records
17.00 pm – 18.00 pm	Recap/overview of step by step DSD case workflow

Dr. Maxim Belograd is a specialist in a field of advanced microscope dentistry with a private practice in Kiev, Ukraine. His occupation is endodontics, restorative and cosmetic dentistry. He is also owner of Belograd Study Club, co-organizer of MicroVision group, official trainer of Zeiss Dental Academy, active member of StyleWorld, DSD master group and international lecturer.

2004 He qualified as a dentist in Ukrainian Medical Dental Academy, Poltava.

He moved to Kremenchug and gained clinical experience in the governmental dental clinic.

2006 He opened his own private dental practice.

2009 The winner of the Ukrainian competition for direct restorative techniques

In 2009 he launched such projects as “The formula of endodontics” and “From endo to restoration”, united endodontics and restorative dentistry in the new direction — microdentistry. Since 2010 he has been the ambassador of the European Society of Microscope Dentistry in Ukraine and in 2012 he has been the speaker of the organization.

2012 Editorial board member of Russian Journal of Aesthetic Dentistry

2013

- Official trainer of Carl Zeiss dental academy
- Speaker of national societies of microscope dentistry in Germany (DGmikro) and Czech Republic (ProMikro)
